

CESCL Re-Certification

Certified Erosion and Sediment Control Lead (CESCL) Training

Is your Certified Erosion and Sediment Control Lead (CESCL) designation about to expire? The Department of Ecology requires a CESCL on all stormwater permitted construction sites over an acre, and CESCL certifications must be renewed every three years with a one-day class.

Designed for residential builders, BIAW's CESCL recertification course will answer the most-asked builder questions, including what BMPs perform best on construction sites, how to keep those BMPs working, what red flags signal erosion problems, and how to effectively work with local and state inspectors. This course will also walk you through the planning and execution of erosion control in a subdivision.

Accreditation:

**Recertification of Certified Erosion and Sediment Control Lead (CESCL)

Register today. These classes will fill quickly.

WA-CESCL certification meets the requirements of the Oregon 1220-C construction general permit for qualified inspectors and the EPA permit requirements for qualified individual.

Must PRE-PAY Registration (price includes lunch):

- \$175 Members
- \$250 Non-Members

Make check payable and return to:

Building Industry Assn. of Washington
P. O. Box 1909, Olympia, WA 98507
Phone (360) 352-7800 Fax: (360) 352-1044
